Elodea Crispa/Canadensis

If keeping the weed for a only a short period of time, cover with water in a shallow tray.

If keeping the weed for a longer period place into an aquarium or similar tank and anchor with gravel or soil, the weed sholud then begin to grow.

Cabomba

Cabomba needs to be in a deep tank or aquarium anchored with soil or gravel to grow well. The water should be between 25-30 C (75-85 F) and a light source may also be required where limited natural light is available.
