Land Snails *Helix aspersa*

Housing: Land Snails should be kept in a small to medium tank. Our **Invertebrate Tanks** are ideal.

Substrate: A substrate of damp peat or similar is preferred with leaf litter and bark for them to hide under.

Temperature: The snails should be kept out of strong sunlight, preferably in a cool area.

Water: The snails do not require drinking water, they will gain water from their food and the atmosphere.

Food: The snails will eat a wide variety of vegetables and fruit such as lettuce, dandelion leaves, apple etc.
