HYDRA

Housing:

Keep *Hydra* in a small aquarium or large culture dish a **Mini Invertebrate Tank** is ideal.

Water:

The dish should be filled with filtered pond or rain water. Distilled or tap water must not be used. The water should be partly changed every day.

Light:

Keep in a dim light, away from direct sunlight.

Handling:

Transfer gently using a pipette or small paint brush.

Food:

Brown *Hydra* feed on *Daphnia* or similar creatures. Allow about 3 *Daphnia* to each *Hydra* (increase as the *Hydra* population grows).

Green *Hydra* can be fed on a drop or two of chlorella every few days.
