PAINTED LADY BUTTERFLY KIT INSTRUCTIONS

1. Divide the nutrient between the vials and press down firmly.
2. Using the paintbrush gently place the larvae on the nutrient.
3. Place on the lids and ensure they are kept out of direct sunlight.
4. It takes approximately 10 days for the larvae to become chrysalids.
5. When the chrysalids have formed place them in the butterfly net.
6. After another ten days the butterflies will emerge.

Feeding

7. Place a paper towel in some sugar water (1tbsp sugar and 200ml of water). Feed your butterflies daily.
8. Once you have observed them, please release them into the environment.
