Planarian

Housing: Keep the *planaria* in a large shallow enamelled dish or **Mini Invertebrate Tank**.

Water: The water, pond water is best, must be kept clean by changing it daily. If the dish is gently tipped, the *planarians* should remain stuck to the dish wall.

Temperature: 10'C - 18'C

Feeding: Offer the planarians food, such as fresh meat or earthworm segments for 30 - 45 minutes.

Please contact us at the above address for a complete catalogue and price list.
